Wind
Speed

Please attempt to determine a Lat / Long for the contact at initial detection. We recommend using JMPS to reference the sensor-derived bearing and range relative to the bullseye you had in use. If that method is not available, any reasonable derivation of location will work, but please be as specific as possible and make a note in the comments section. These locations may be used to cue other means of tracking.

Was the contact moving? Yes

Direction/Speed
(Ex. 090/15)

150/230

Please use the field below to describe the contact and any interaction in your own words with as much detail as possible. Please be sure to include any detail not included in questions above.

MGRS Grid of initial contact: 39RWL26 (b)(1)1.1a

Saw the initial object fly through the screen and started tracking it. Initial object was surpassed by another object of same size and shape but much higher speed. At one point during tracking the objects, there were three on the screen at the same time moving amongst each other.

Don't use the purple "submit" button! Save this form with filename "Date_Squadron_RF.pdf" and email it to [3.5c, (b)(6)] (Also in the global). For troubleshooting, call [3.5c, (b)(6)]

Thank you for your time. Please ensure all display tapes are ripped for the entire time of interaction and saved as a .wmv (Example: 4 May VFA-106 HUD.wmv). Squadron intel personnel shall upload those files to the repository located at this link.
